**Internship for an Electrical/Process Student** (ID 1810738)

We are looking for an ambitious Student (m/f) supporting our business in Stade, Germany who is interested in doing an Internship on Natural Gas Measurement Systems in the Gas Turbine Enclosure.

**Main Responsibilities**

In the enclosures of our three gas turbines, we have gas sensors for leak detection of natural gas. Due to their sensitivity to other gases, this sensors are not appropriate for the intended purpose. We are looking for a different type of sensor.

Your main tasks will consist in:

- Analyzing the current situation to identify the needs
- Contact and be the focal point with the suppliers
- Take measurements to provide a better detection system

**Our Requirements**

- You are studying for a University Degree in Electrical/Process Engineering
- You are fluent in English & German
- You have basic knowledge in the field of measurement technology
- You like teamwork and independently working

If you picture yourself as part of a team that creates higher performance for customers and reshapes the world around us for a better future, we invite you to learn more about Dow. We offer countless possibilities for you to make a difference.
