Advance your career

LyondellBasell (NYSE: LYB) is one of the largest plastics, chemicals and refining companies in the world. Our products and technology are found in nearly every sector of the economy and are key to advancing food safety, protecting the purity of water supplies, and improving the safety, comfort and fuel efficiency of many of the cars and trucks on the road. Every day, our 13,400 dedicated employees work to advance the positive future we know is possible.

We are looking to recruit highly talented and motivated

Manufacturing Engineer Graduates (m/f)

Your Qualifications:

- University master’s degree in chemistry, mechanics, electricity, safety, environment (or equivalent)
- Strong capability for growth, thinking out of the box, strong interpersonal skills, organized and thorough, driven by results, analytical
- Flexibility and mobility: eligibility to work in the European Union, ability to relocate from one European country to another without separate work permits and availability and willingness to relocate
- Fluent in English both verbally and in writing, good knowledge of a second language is preferred
- Proficiency in use of MS Office in addition to any relevant engineering software

Your Mission:

- Hiring and Onboarding in the Netherlands
- At least three different assignments to our sites across Europe as Process/Project Engineer, Production- or HSE-Engineer
- Assure innovation and continuous improvement of safety, production processes, plants reliability and efficiency and cost competitiveness
- Promoting technical solutions in compliance with national legislation and company internal rules and procedures
- Participate in plant pre-start-up checks, pre-commissioning, commissioning and start-up activities, including personnel training
- Document and update the Know-how of production processes, to be available within the plant staff and within the company through the Knowledge Exchange Communities.

What we offer:

LyondellBasell offers challenging career opportunities, quick personal growth in a modern and dynamic environment, extensive training and a very attractive salary package with an unlimited employment contract in the Netherlands. We are a company with a strong technical footprint, excellent marketing background and a thriving ambition to stay ahead of the competition. To achieve the required level of capability, the program is a combination of on-the-job learning, social learning and formal training. We offer you structured mentorship and training to maximize your success.
